

## Arvados - Bug #10096

RichCollectionBase's `_get_src_target` method would crash if "source" argument is not basestring and "target\_path" is empty.

09/19/2016 02:24 PM - Lucas Di Pentima

### Description

Looking at `sdk/python/arvados/collection.py:816`, it seems that `sourcecomponents[-1]` would make the program crash before the exception raise statement:

```
# Determine the name to use.
target_name = targetcomponents[-1] if targetcomponents[-1] else sourcecomponents[-1]

if not target_name:
    raise errors.ArgumentError("Target path is empty and source is an object. Cannot determine destination filename to use.")
```
