

Arvados - Bug #10349

[DOC] add cookbook section with code snippets

10/25/2016 06:53 PM - Ward Vandewege

Status:	Resolved	Start date:	10/25/2016
Priority:	Normal	Due date:	
Assigned To:	Peter Amstutz	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	2017-09-13 Sprint		
Description			
More examples for api calls with real use cases, e.g. users/links/groups, or collections/projects, i.e. let's add a cookbook section with code snippets to doc.arvados.org			
Subtasks:			
Task # 10381: Review Resolved			

Associated revisions

Revision 7385689b - 09/12/2017 03:18 PM - Peter Amstutz

Merge branch '10349-cookbook' closes #10349

- Target version changed from 2017-08-02 sprint to 2017-08-16 sprint

#21 - 08/14/2017 01:36 PM - Peter Amstutz

I started writing out some code snippets for operating on container requests based on the scripts at <https://github.com/bcosca/aryados-tools>

10349-cookbook @ [efd0ed5fa583d09f7d272ecc9461ec1684cf0cb4](https://github.com/bcosca/aryados-tools)

#22 - 08/16/2017 06:57 PM - Tom Morris

- Assigned To deleted (Tom Morris)

#23 - 08/16/2017 06:58 PM - Tom Morris

- Target version changed from 2017-08-16 sprint to 2017-08-30 Sprint

#24 - 08/16/2017 07:13 PM - Peter Amstutz

- Assigned To set to Peter Amstutz

#25 - 08/25/2017 06:39 PM - Bryan Cosca

Ideas to add: (These are things I think I know how to do, but think other people would want) This all comes from a debugging standpoint and trying to get info out of a workflow as fast as possible.

Given a top level container request:

List output pdh of all child container requests

List output pdh of only some child container requests (maybe this is just a grep of listing all)

List inputs of all child container requests (not just the input yml, the pdhs and files)

List inputs of only some child container requests (maybe this is just a grep of listing all)

List all child failed container request uuids given top level uuid

List log file pdh given container request uuid
