

Arvados - Bug #11679

[Workbench] Logs containers with undefined exit code

05/11/2017 02:23 PM - Peter Amstutz

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assigned To:	Tom Clegg	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
Workbench logs container state change messages. When a container is complete, it looks at the exit code and reports success or failure. However, for some reason, the exit code is reported as undefined, which is not zero, and it reports failure (I've seen this with both exit code 1 and exit code 0):			
<pre>2017-05-11T14:12:36.420834199Z Waiting for container to finish 2017-05-11T14:18:49.777935199Z Container exited with code: 1 2017-05-11T14:18:49.993315999Z Complete 2017-05-11T14:18:50.791787Z Container gr1hi-dz642-hre34ora0zbr9k1 finished with exit code undefined (failure)</pre>			

History

#1 - 05/11/2017 02:27 PM - Peter Amstutz

- Subject changed from [Workbench] Logs completed containers as failed to [Workbench] Logs containers with undefined exit code
- Description updated

#2 - 05/11/2017 02:34 PM - Tom Clegg

arvados-ws sends properties.new_attributes.state but does not send properties.new_attributes.exit_code; see [sendObjectAttributes](#) in [source:services/ws/session_v0.go](#).

Workbench assumes the update event will include exit_code if it includes state=Complete; see [source:apps/workbench/app/assets/javascripts/work_unit_log.js](#).

#3 - 08/08/2017 09:39 PM - Tom Morris

- Target version set to 2017-08-30 Sprint

#4 - 08/16/2017 07:36 PM - Tom Morris

- Target version changed from 2017-08-30 Sprint to Arvados Future Sprints

#5 - 08/16/2017 07:38 PM - Tom Clegg

- Assigned To set to Tom Clegg

#8 - 07/06/2021 09:22 PM - Peter Amstutz

- Target version deleted (Arvados Future Sprints)
