

Arvados - Bug #11691

Using cwl, when you obtain files (file objects) from a directory listing they lose some fields when compare to files listed in cwl doc

05/12/2017 06:44 PM - Sarah Zaranek

Status:	New	Start date:	05/12/2017

Target version:			
Description			
If I get the files from doing a directory.listing - and then try to use file.nameroot on the individual - it gives me a null in return (note: file.basename works fine). Not sure is this is an issue with the arvados cwl runner or just with cwl is general.			
Not sure if this is a bug or an enhancement request :)
