Description			
Again, not sure if this is a bug, and/or if it is an issue with the arvados cwl runner or cwl in general.			
When I try to use certain str methods sch as str.includes in a cwl script (as part of Expression Tool) it doesn't work and stops running.			
I narrowed it down and cut and pasted a simple example from a javascript doc page			
<pre>var str = "Hello world, welcome to the universe."; var n = str.includes("world");</pre>			

History

#1 - 05/19/2017 05:22 PM - Peter Amstutz

str.include is not part of core Javascript. The standard library is described in the specification:

<https://www.ecma-international.org/ecma-262/5.1/>
