#### History

##### #1 - 08/09/2017 05:21 PM - Peter Amstutz

- Status changed from New to In Progress
- Assigned To set to Peter Amstutz
- Target version set to 2017-08-16 sprint

##### #2 - 08/09/2017 06:30 PM - Tom Clegg

LGTM.

A more general comment: The test suite seems heavy on the copy-paste. Why do all these test cases have "except: logging.exception("")"? Hopefully it isn't considered normal for these blocks to fail in lots of different ways -- could we specify the exception(s) we're expecting due to the test environment?

I don't have a good explanation for the try/except blocks. The best I can think of is that at one point it was failing for some reason, but I wanted to see the result of the assert\_called\_with checks to know what was actually wrong.

I agree there is a number of tests in that file could be cleaned up a bit and put into a framework. (I'll keep that in mind for next time I touch this).

##### #4 - 08/09/2017 06:55 PM - Peter Amstutz

- Status changed from In Progress to Resolved
- % Done changed from 0 to 100
