This looks good. I have two small suggestions:

1. I think you can write "klass.columns.collect{|c| c.name}" as "klass.columns.collect(&:name)"
2. Add a couple of checks to the test "delete projects and their contents in SweepTrashedObjects" that things which **shouldn't** be deleted, were not deleted.

Test run: <https://ci.curoverse.com/job/developer-run-tests/674/>

Updated test to confirm that only the expected records are being deleted.
