

Arvados - Bug #12844

WebDAV MOVE

12/19/2017 02:26 PM - Fuad Muhic

Status: Resolved	Start date: 12/21/2017
Priority: Normal	Due date:
Assigned To: Tom Clegg	% Done: 100%
Category:	Estimated time: 0.00 hour
Target version: 2017-12-20 Sprint	
Description I believe that when you try to move folder to its own subfolder, it gets eaten and you get 201. Example from R: collection\$move("my/folder", "my/folder/subfolder/folder") I get 201 and when I do PROPFIND I can't see my folder anywhere. Please confirm that it actually is a bug.
