Target version:	sprint 6		
Description			
As a user I would like to move collection to another location so that collection changes its location in the hierarchy			
Acceptance criteria:			
<ul style="list-style-type: none">- I can trigger moving operation on a collection (context menu in the table or the tree)- I can select target project in a modal dialog- Collection is moved- Permission handling- Confirmation messages			
User flow:			
1a. Right click on collection inside the table and choose "Move to".			
1b. Click on "More options" icon in the table and then choose "Move to".			
2. Popup appears where user has possibility to select different location.			
3. Snackbar appears in the bottom of the page with the information that "Collection has been moved"
