##### #6 - 11/26/2018 10:55 PM - Lucas Di Pentima

- I think a-c-r docs need some updates about the new parameters, and also maybe a submission example as the final part of the federated-workflows.html page?
- Would it be convenient to mention that Workbench currently won't be showing remote steps?
- I think there's also missing information about `cwl#dockerCollectionPDH`, right?

Refreshed the `cwl-run-options` page, added a section about `--submit-runner-cluster`, and added an example command line.

- Would it be convenient to mention that Workbench currently won't be showing remote steps?

Added a note.

- I think there's also missing information about `cwl#dockerCollectionPDH`, right?

Added a note to CWL extensions.

There're some rendering issues on the a-c-r command line options table. The rest LGTM
