<b>Description</b>			
Customer wrote:			
I was wondering if there have been any recent changes to the markup syntax used for Project/Collection descriptions in the Arvados Workbench?			
I have previously been arranging some metadata into a table and storing this in Collection descriptions (as well as in the 'properties' field of the Collection record). We recently upgraded our installation to 1.2.0 and now the tables are no longer displaying as they were.			
I'm using this table syntax;			
<pre>table(table table-striped table-condensed).  _ . First Header  _ . Second Header    Content Cell  Content Cell    Content Cell  Content Cell  </pre>			
I'm sure the Textile markup system was in use before, and aspects of that syntax still work, but tables do not.

Updates at [8299fa11d1e813ea52e3ea482214d12044119bc3](#) - branch 14519-wb-textile-issues

Test run: <https://ci.curoverse.com/job/developer-run-tests/983/>

Fuse tests retry: <https://ci.curoverse.com/job/developer-run-tests-services-fuse/997/>

Added table related tags to sanitize()'s tag whitelist. For some reason rails doesn't include them by default. See:

<https://github.com/rails/rails-html-sanitizer/issues/50>

**#8 - 11/26/2018 07:38 PM - Tom Clegg**

I think it would make sense to add the other table elements too — col, colgroup, caption, thead, tfoot — assuming there's no reason not to?

LGTM

**#9 - 11/26/2018 08:02 PM - Lucas Di Pentima**

- Status changed from *In Progress* to *Resolved*

- % Done changed from 0 to 100
