### History

**#1 - 03/08/2019 04:31 PM - Peter Amstutz**
Documentation build currently assumes arvados-sdk-java is checked out alongside the main arvados repo. Need to decide where the orchestration of cloning that repo should really go.

To view documentation:

```bash
$ bundle exec rake baseurl=file://$PWD/.site
$ xdg-open .site/sdk/java-v2/index.html
```
