Description

As a user, I would like to have the possibility to filter processes by their status.
so that I can see the needed data.

Acceptance criteria:
- filters available in Status column
- after clicking on the status label popup appears with checkbox filers
- there are the following process statuses: Failed, Running, ~~Locked~~ Queued, ~~Uncommitted~~ Cancelled, Completed

- Description updated

The current "Locked" and "Uncommitted" statuses don't match the specification in #13776. If it's possible to easily fix that as part of this story let's do that. Otherwise we can create a ticket to fix that first, before doing this ticket, because it doesn't make sense to do the implementation and then immediately have to change it.

Updates at commit baba7179 - branch 15019-project-view-status-filter (wb2 repo)

I've based this branch from 15672-subprocess-list-v2, so I suggest reviewing that one first.
Added Eric's status filtering component to project panel's Status column and tried adding filters to the /contents endpoint like this one:
[['container_request.container.state', '=', 'Cancelled']]. It worked! Not sure if we already forsee this use case, but didn't find any mention of it on the
Arvados docs, maybe we should.

This has the same issue as 15672 where individual processes will live-update from Running to Completed, but the listing isn't refreshed. Perhaps we
can solve it the same way, too? Deciding when to refresh the list of processes owned by a project should be basically the same as refreshing the list
of processes created by a certain container request.
