

Arvados - Story #15356

[Composer] Use cluster config

06/12/2019 02:54 PM - Tom Morris

Status: Resolved	Start date: 07/31/2019
Priority: Normal	Due date:
Assigned To: Peter Amstutz	% Done: 100%
Category:	Estimated time: 0.00 hour
Target version: 2019-08-14 Sprint	
Description Fetch the safe clusterwide config to bootstrap the app. Update app to expect clusterwide config. Composer should go to a well known endpoint relative to the app's base URL, which should then redirect to or proxy for the public clusterwide config exported by controller (#15000).	
Subtasks: Task # 15485: Review 15356-use-cluster-config Resolved

#8 - 07/31/2019 03:03 PM - Lucas Di Pentima

This LGTM, the only nit would be that I'm not sure if we should enforce https on composer's api_host config.

We don't support non-HTTPS for the API server and never have. This is intended to be consistent with ARVADOS_API_HOST which also assumes HTTPS.

A couple additional comments:

- The install docs should be updated: <https://doc.arvados.org/v1.4/install/install-composer.html>
- Also arvbox could be updated
