- Description updated

##### #2 - 10/21/2019 07:59 PM - Lucas Di Pentima

The arvados-google-api-client gem has a dependency on googleauth (~> 0.3), so the new Gemfile.lock asked googleauth 0.10.0 (instead of 0.8.0) which asks for signet (~> 0.12), which asks for ruby >= 2.4.0. Our documentation (on master) states that the API server is known to work with ruby 2.3, so we either also update the documentation and drop ruby 2.3 support, or pin the requirement on googleauth to 0.8.0

##### #3 - 10/21/2019 08:45 PM - Lucas Di Pentima

- Status changed from In Progress to Resolved

This issue is fixed on #15699
