15823-dispatchcloud-api-docs @ [21b4ab9d1db2cddeb77908c6fe575be041d9ff6c](#) --

**#10 - 01/13/2020 09:40 PM - Peter Amstutz**

Explain the return format of "List containers" a little better. Seems to be an object with two fields, "container" and "instance\_type" but the text doesn't say anything about "instance\_type".

To be absolutely clear on terminology I would add a line defining "instance" as "a cloud VM" also sometimes referred to as a compute node.

Rest LGTM.

**#11 - 01/13/2020 10:12 PM - Tom Clegg**

Updated the doc to use "instance" consistently, added a note about the alternate terms.

Noted the instance\_type part of the "lsit containers" response.
