15828-trust-wb @ [acb8ea09b9d699bb5c955a5279a0aca2e0906c39](https://github.com/veritasgenetics/arvados/commit/acb8ea09b9d699bb5c955a5279a0aca2e0906c39)

Override is\_trusted so that it is always true for the configured external URL of workbench1 and workbench2.

##### #5 - 11/14/2019 02:43 AM - Peter Amstutz

- Assigned To set to Peter Amstutz

##### #6 - 11/14/2019 03:24 PM - Tom Clegg

LGTM.

In order for this to work in practice we might need to mention Services.Workbench2.ExternalURL on <https://doc.arvados.org/master/install/install-api-server.html> (only Workbench1 is there).

The "Trusted client setting" sections should probably be deleted from <https://doc.arvados.org/master/install/install-workbench-app.html> and <https://doc.arvados.org/master/install/install-workbench2-app.html>.

Yep, I will be incorporating all that in [#15572](#). I desperately wanted to make sure this fix got in specifically because it would eliminate a very error-prone step from install process.
