

Arvados - Bug #15905

[API] Add ruby gem build dependencies as API server package dependencies

12/03/2019 11:11 PM - Peter Amstutz

Status:	Resolved	Start date:	12/30/2019
Priority:	Normal	Due date:	
Assigned To:	Ward Vandewege	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	2020-01-02 Sprint		
Description			
In order to install arvados-api-server successfully, several build dependencies are needed to compile ruby gems. Currently the documentation instructs the user to install these alongside the arvados-api-server package: https://doc.arvados.org/master/install/install-api-server.html#install_apiserver But this seems silly, they should just be dependencies of arvados-api-server. Workbench1 probably has a similar situation.

Description: Arvados API server - Arvados is a free and open source platform for big data science.

That does not include the bison and build-essentials packages, though.
