

Arvados - Bug #15933

[API] user setup method missing "uuid" parameter in discovery document

12/15/2019 04:34 AM - Peter Amstutz

Status:	Resolved	Start date:	12/17/2019
Priority:	Normal	Due date:	
Assigned To:	Peter Amstutz	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	2020-01-02 Sprint		
Description			
User setup can't be done from command line because it is missing the "uuid" parameter.			
Also, it accepts a "user" object parameter but I don't think it does anything. It should be removed.			
Also, trying to invoke "setup" gave a weird error, apparently it turned the 'setup' request into a 'update_uuid' request. Maybe controller is rewriting the request?			
<pre>{"errors":["request failed: http://localhost:8004/arvados/v1/users/ce8i5-tpzed-6oia07y9o4zvtl6/update_uuid: 422 Unprocessable Entity: #\u003cArgumentError: new_uuid parameter is required\u003e (req-92kuwtcxxmpmz2i94jr7) "]}</pre>

- Target version changed from 2020-01-02 Sprint to 2020-01-15 Sprint

#4 - 12/16/2019 02:21 PM - Tom Clegg

Also, trying to invoke "setup" gave a weird error, apparently it turned the 'setup' request into a 'update_uuid' request. Maybe controller is rewriting the request?

This was fixed in [#15922](#).

#5 - 12/17/2019 08:38 PM - Peter Amstutz

Also, it accepts a "user" object parameter but I don't think it does anything. It should be removed.

Actually it does still do something with the user object, it creates a new user with the supplied attributes and then set up the user.

- Status changed from New to In Progress

#8 - 12/17/2019 08:49 PM - Peter Amstutz

15933-setup-uuid-param @ [7e77dad2912c2eee85cc5e5876f35cf55a4cfc69](https://github.com/7e77dad2912c2eee85cc5e5876f35cf55a4cfc69)

- Add 'uuid' parameter
- Remove unused 'openid_prefix' parameter

#9 - 12/17/2019 10:51 PM - Lucas Di Pentima

The changes LGTM. I've tried several times to start a new arvbox instance but for some reason the API server is failing, but don't think it's related to this branch:

```
