Reviewing branch 16041-valid-name @ commit c29de73 (wb2 repo):

- The warning component doesn't take into account the case when the slash char is allowed. Looking at the reworded warning message I suppose the idea is to show the warning even if the site admin configured a substitution, my opinion is that if the admin allows slashes is because they're needed and so showing warnings on the UI would be confusing and/or annoying to users.
- Other than that, it LGTM.

Ok, the warning is now conditional on ForwardSlashNameSubstitution.
