##### #8 - 03/12/2020 10:36 PM - Lucas Di Pentima

- File doc/admin/scoped-tokens.html.textile.liquid - Line 27: the example scope is using a POST method
- We already have some documentation on scopes here: <https://doc.arvados.org/api/tokens.html#scopes>, do you think it's necessary to have it on both places? If so, should it have a link to the admin section?
- The shell server installation docs also mention scopes: <https://doc.arvados.org/install/install-shell-server.html#scoped-token>, maybe it will be useful to link to the admin section for the reader to be able to get more information.

Argh, so this ticket was filed because Ward thought it was completely undocumented because he didn't find it when he looked. I didn't remember it was there either. I'm keeping the text in both places and linking them.

Good idea.
