

Arvados - Bug #16177

TrustAllContent config

02/25/2020 08:35 PM - Peter Amstutz

Status:	Resolved	Start date:	02/26/2020
Priority:	Normal	Due date:	
Assigned To:	Peter Amstutz	% Done:	100%
Category:	Workbench	Estimated time:	0.00 hour
Target version:	2020-03-11 Sprint		
Description			
<p>The issue is that workbench1 is checking the wrong configuration item to retrieve the TrustAllContent value. It is checking on Workbench.TrustAllContent while the value is defined under Collections (IIRC, I'm not in front of the computer right now). This causes that clicking on the "inline" view for a file redirects to downloads instead of collections (WebDAV).</p>
