

Arvados - Bug #16221

arv-mount 2.0.1 reported not backwards compatible with 1.4

03/06/2020 02:16 PM - Peter Amstutz

Status:	Resolved	Start date:	03/12/2020
Priority:	Normal	Due date:

Target version:	2020-03-25 Sprint		
Description			
User report:			
Some of our automated build machines pull in the latest version of python-arvados-fuse and python-arvados-python-client when they build themselves, which means they're now getting 2.0.1-1 versions of these packages. When we use this version of arv-mount with our cluster the mount appears to work as expected, but any attempt to actually list a collection just leads to an empty directory.			
This was intended to work so I'm not sure if this was a oversight in testing or a mistake in cherry-picking into the release branch.

#4 - 03/12/2020 04:43 PM - Lucas Di Pentima

Ok, I was finally able to test arv-mount against a 1.4 arvbox instance and it works correctly.

This LGTM, thanks!
