

Arvados Workbench 2 - Bug #16225

Issues with interactively deleting project from Workbench 2 from Project Browser

Description			
When I delete a project from the Project Browser (move to trash):			
1) It gives me an error about Path Not Found (because I am on the project that was moved to trash)			
2) It actually doesn't remove the project from the Project Browser (doesn't clear out cache?) -- need to logout and log back in to see it removed.
