Updates at [3cc81d120](https://github.com/3cc81d120) - branch 16435-sync-groups-perm-levels
Test run: <https://ci.arvados.org/job/developer-run-tests/1871/>

- Adds ability to control permission level on a third field of every CSV record. Possible values are: can_read, can_write, can_manage.
- It understands the previous format: when a record has only 2 fields, the default permission level is can_write.
- Adds new tests, updates others.
- Updates documentation.
