Ready for review in [8f6f8d5d727c9b0ae4600c7b546db248e012d203](#) on branch 16451-run-tests-interactive-run-test-many-times

##### #3 - 05/20/2020 01:44 PM - Tom Clegg

Shifting the vars around this way leaves testargs as "" instead of empty when there are no opts provided. AFAICS the only side effect is that the "go test" recipe won't use coverflags, which doesn't seem too important. Maybe worth doing something like this instead?

```
if [[ "${nextcmd}" =~ ^[0-9] ]]; then
  read count nextcmd <<<"${nextcmd}"
fi
```

Other than that nit, LGTM.

Other than that nit, LGTM.

Yes! That's also a nice simplification. Merged with that fix, thanks.
