- Status changed from New to In Progress

#2 - 05/27/2020 02:29 PM - Lucas Di Pentima

I believe we don't need to do anything at this time, because:

- CVE-2020-8164 (Possible Strong Parameters Bypass in ActionPack): I haven't found any occurrence of code using each, each_pair or each_value on params.
- CVE-2020-8166 (Ability to forge per-form CSRF tokens in Rails): Is a low severity issue and no workarounds are offered, just to upgrade whenever possible.
- CVE-2020-8165 (Unintended unmarshalling in ActiveSupport): Is about MemCacheStore and RedisCacheStore, which we don't use.

#4 - 05/27/2020 07:32 PM - Lucas Di Pentima

- Status changed from In Progress to Closed

We'll be updating rails to at least 5.2 soon.
