[Workbench1] uploader fails - discovery doc URL with double slash fails CORS check

Priority:	Normal	Due date:

Target version:	2020-06-17 Sprint		
Description			
Workbench1 is trying to load "https://api.example//discovery/v1/..." but Go's built-in redirect-without-double-slash feature doesn't send CORS headers, so the browser throws an error and (for example) file upload can't start.
