

Arvados - Story #16561

Add "Listen" to Services config

06/24/2020 04:40 PM - Peter Amstutz

Status: New	Start date:
Priority: Normal	Due date:

Category:	Estimated time: 0.00 hour
Target version:	
Description "InternalURLs" is used to provide the bind address but people expect it to mean a URL that is valid on the private network. Add a "Listen" field which expresses the bind addresses that the server will use. Then "InternalURLs" can mean URLs that are valid on the private network.
