

Arvados - Feature #16574

Can limit which users can submit container requests.

06/29/2020 05:05 PM - Peter Amstutz

Status: New	Start date:
Priority: Normal	Due date:
Assigned To:	% Done: 0%
Category:	Estimated time: 0.00 hour
Target version:	
Description We want a "data cluster" where users create federated accounts and can download public data, but most users should not be allowed to run containers. Other user limits: Would also be useful to limit which users can run containers with network access enabled. Might be useful to come up with a general design for expressing user capabilities.
