- Status changed from New to In Progress

#8 - 09/15/2020 05:54 PM - Lucas Di Pentima

Some observations while reviewing [8f9a16c](#) :

- You mentioned on standup that the tutorial's formatting is almost identical than the original document on purpose. I haven't seen the doc but I'm seeing that if you resize the window horizontally, the text doesn't flow with the window. This makes the headers multi-line as they have large font size. I personally don't like having super long multi-line headers, so I wanted to point it out just in case it wasn't on purpose.
- On "...and let's them run the workflow by clicking the Run a process... button..." I think the button name could be put inside quotes or something similar.
- At step 4b there're 3 links being rendered with their paths.
- All the screenshots include a note starting with "Screenshot of..." I think that's redundant and can be removed.

- At step 6 there're some a-c-r and bwamem-samtools-view mentions that could be formatted the same way as file names.
- At step 7 the link to the info@curii.com account should be a mailto: link.

Some observations while reviewing [8f9a16c](#) :

- You mentioned on standup that the tutorial's formatting is almost identical than the original document on purpose. I haven't seen the doc but I'm seeing that if you resize the window horizontally, the text doesn't flow with the window. This makes the headers multi-line as they have large font size. I personally don't like having super long multi-line headers, so I wanted to point it out just in case it wasn't on purpose.

I set "max-width" to match the Google docs, so the lines break almost the same way. That's mostly what I meant about "matching the google doc formatting".

The super long multi-line headers are from Sarah's original document.

- On "...and let's them run the workflow by clicking the Run a process... button..." I think the button name could be put inside quotes or something similar.

I marked up the things that are workbench buttons to actually look like workbench buttons.

- At step 4b there're 3 links being rendered with their paths.

That's how it was in the original document but I agree they would be better as regular hyperlinks.

- All the screenshots include a note starting with "Screenshot of..." I think that's redundant and can be removed.

Fixed.

- At step 6 there're some a-c-r and bwamem-samtools-view mentions that could be formatted the same way as file names.

Fixed.

- At step 7 the link to the info@curii.com account should be a mailto: link.

Fixed.
