Ward:

- In doc/install/crunch2-cloud/install-compute-node.html.textile.liquid

[L13](#): "a on premises" -> " *an* on premises"

[L24](#): "that it can be used"

[L35](#): "a \neq SSH keypair"

[L173](#): "be replaced name" -> "be replaced *with the* name"

- In doc/install/crunch2-cloud/install-compute-node.html.textile.liquid

[L27](#): perhaps "These steps must be ~~executed~~ on every compute node." -> "These steps must be *performed* on every compute node." sounds better?

- Perhaps rename

```
tools/compute-images/scripts/etc-cloud-cloud.cfg.d-07_compute_puppetless_arvados_dispatch_cloud.cfg
```

to

```
tools/compute-images/scripts/etc-cloud-cloud.cfg.d-07_compute_arvados_dispatch_cloud.cfg
```

and modify [the reference here](#) and [here](#) ?
