

Arvados - Bug #16832

replace linkchecker in our build environment

09/10/2020 07:34 PM - Ward Vandewege

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assigned To:	Ward Vandewege	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
It's Python 2 only, and appears unmaintained upstream.			
When done, make sure to update			
<code>lib/install/deps.go</code>			
so that			
<code>arvados-server install -type test</code>			
keeps doing the right thing.

Looks like there is at least some action upstream to release version 10.0, which supports Python3:

<https://github.com/linkchecker/linkchecker/issues/359>

If they managed to push that to pypi, we could simply update the `install_env()` function in `run_tests.sh` (a la [#16833](#)), remove the linkchecker package from `func RunCommand` in `lib/install/deps.go`, and call this story a day. I suppose we could even use the `pip3` install line they suggest directly from github, but it seems that could lead to future instability.
