

## Arvados - Bug #16974

### Explain RemoteClusters.Proxy and .ActivateUsers better

10/07/2020 06:55 PM - Peter Amstutz

<b>Status:</b>	Resolved	<b>Start date:</b>	02/02/2021
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assigned To:</b>	Nico César	<b>% Done:</b>	100%
<b>Category:</b>	Documentation	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	2021-02-03 Sprint		
<b>Description</b>			
[peer federation] [WB1] [admin interface]			
On ce8i5, 9tee4 remote clusters entry:			
<pre>9tee4:   Host: 9tee4.arvadosapi.com   Proxy: true</pre>			
On 9tee4, the ce8i5 remote clusters entry:			
<pre>ce8i5:   Host: ce8i5.arvadosapi.com   Proxy: true</pre>			
The user list in the admin interface lists entries with foreign UUIDs (their existence is normal). But clicking on 'show' leads to a 'Not found' error page, e.g. <a href="https://workbench.9tee4.arvadosapi.com/users/ce8i5-tpzed-o4njwilpp4ov286">https://workbench.9tee4.arvadosapi.com/users/ce8i5-tpzed-o4njwilpp4ov286</a> .			
Does it make sense to enumerate the users with foreign UUIDs in that list?			
If we don't; what's the implication of ActivateUsers being off for a cluster listed in RemoteClusters?			
Update: adding 'ActivateUsers: true' on both sides fixes this issue.			
Update 2021-02-02: even with 'ActivateUsers' on both sides this no longer works. Since this is a documentation ticket, I filed a new bug at <a href="#">#17314</a>
