Hmm, it seems we already have a (relatively terse) explanation of can_login links on this page:

https://doc.arvados.org/v2.1/install/cheat_sheet.html (see the "VM login" section)

What kind of change did you have in mind?

Some mention in /api/methods/links.html and/or /api/permission-model.html

Specifically can_login has a couple of special properties for setting the Unix username and group membership.

Right. I've added some text to the "permission model" page in the API section. Ready for review at a847c48edba67805cff0104386845be799d74073 on branch 17255-document-can_login-permission.
