

Arvados - Bug #17333

arvados-cwl-runner does not validate that project-uuid is valid, and returns confusing error message if not

02/03/2021 09:30 PM - Ward Vandewege

Status:	Resolved	Start date:	06/21/2021
Priority:	Normal	Due date:	
Assigned To:	Peter Amstutz	% Done:	100%
Category:	CWL	Estimated time:	0.00 hour
Target version:	2021-06-23 sprint		
Description			
If you give arvados-cwl-runner a --project-uuid argument that is not a valid project uuid (for example, you give it a collection uuid), then it errors out with a very confusing message:			
<pre>INFO Name conflict on 'Downloads files from URL(s) input (3e987fd3b2f7601a8966389abf5ad892+123)', existing collection has an unexpected portable data hash ERROR Unhandled error: <HttpError 403 when requesting https://2xpu4.arvadosapi.com/arvados/v1/collections?ensure_unique _name=true&alt=json returned "request failed: http://localhost:8004/arvados/v1/collections: 403 Fo rbidden: Owner uuid must be set to User or Group (req-hgbkh6u2owgawb9bfgw4) "></pre>
