### Revision 032b245d - 06/03/2021 04:04 PM - Peter Amstutz

Tweak version-at-commit.sh for interim releases (X.Y.Z.A)

Assign correct intended dev version when there is a X.Y.Z.A tag (not just X.Y.Z) in the history.

As of this writing we don't have tags like that in the arvados repo, but we do have tags like that in the workbench2 repo, so this commit is just about synchronizing the script for consistency between the two repos.
