

Arvados - Bug #17601

[deployment][arvados-formula] webshell needs a cron for login-sync

04/29/2021 12:08 PM - Javier Bértoli

Status:	Resolved	Start date:	05/28/2021
Priority:	Normal	Due date:	
Assigned To:	Javier Bértoli	% Done:	100%
Category:	Deployment	Estimated time:	0.00 hour
Target version:	2021-06-09 sprint		
Description			
The formula is adding the login-sync gem, but not a cron to run it every two minutes. We need to add			
<pre># SALT_CRON_IDENTIFIER:arvados_login_sync */2 * * * * /usr/local/bin/arvados-login-sync</pre>			
Shell node needs to be registered to API to run the script, so that needs to be fixed before this ticket.			
Subtasks:			
Task # 17645: Review #17607 register-shell-nodes			Resolved

History

#1 - 05/04/2021 07:24 PM - Peter Amstutz

- Blocks Story #17512: Release Arvados 2.2 added

#2 - 05/05/2021 03:48 PM - Javier Bértoli

- Status changed from New to In Progress

#3 - 05/05/2021 03:54 PM - Javier Bértoli

- Blocked by Feature #17607: [deployment][provision][arvados-formula] register shell nodes with Arvados added

#4 - 05/05/2021 03:56 PM - Javier Bértoli

- Status changed from In Progress to New

- Description updated

#5 - 05/12/2021 03:48 PM - Peter Amstutz

- Target version changed from 2021-05-12 sprint to 2021-05-26 sprint

#6 - 05/13/2021 03:27 PM - Peter Amstutz

- Release set to 38

#7 - 05/17/2021 10:16 PM - Javier Bértoli

- Status changed from New to In Progress

Added an example of some crude orchestration to get a shell node's scoped token and vm uuid and add them in a cron for arvados-login-sync.

As these tasks require *orchestration* (api server must be running before these queries being possible), I added them as examples, as they're useless on a single node configuration (which is the scope of a salt formula)

commit 4040230@arvados-formula, branch 17607-register-shell-nodes.

Need testing

#8 - 05/26/2021 04:34 PM - Peter Amstutz

- Target version changed from 2021-05-26 sprint to 2021-06-09 sprint

#9 - 05/28/2021 02:07 PM - Javier Bértoli

- Status changed from In Progress to Feedback

Some more fixes (squashed, sorry. Habit :))
The cron is provided as an example state.

commit:e6dace0|arvados-formula, branch 17607-register-shell-nodes

#10 - 05/28/2021 03:16 PM - Lucas Di Pentima

- File test/salt/states/examples/arvados/shell/cron/add-login-sync.sls - Line 50: The grep execution on the unless clause of the example relies on the cluster prefix to be fixme instead of just a 5 alphanumeric string.
- Is there a way to properly test these examples (via jenkins, or manually)? I feel that just reading the code isn't enough to catch issues.

The rest LGTM

#11 - 05/28/2021 03:56 PM - Javier Bértoli

- Blocks deleted (Story #17512: Release Arvados 2.2)

#12 - 05/28/2021 06:55 PM - Javier Bértoli

fixed commit:b47321d|arvados-formula

- Is there a way to properly test these examples (via jenkins, or manually)? I feel that just reading the code isn't enough to catch issues.

Not yet. These changes require orchestration, which I haven't set up yet in jenkins

#13 - 05/28/2021 06:57 PM - Lucas Di Pentima

LGTM, thanks!

#14 - 05/28/2021 07:38 PM - Javier Bértoli

- Blocked by deleted (Feature #17607: [deployment][provision][arvados-formula] register shell nodes with Arvados)

#15 - 05/28/2021 07:48 PM - Javier Bértoli

- Status changed from Feedback to Resolved
