Reviewing [703bd34](#)

- Some tests are failing: <https://ci.arvados.org/job/developer-run-tests/2551/>
- File lib/config/config.default.yml - Line: 555 mentions SSO in a comment
- File lib/config/generated_config.go needs updating, it has SSO entries.
- File doc/api/tokens_sso.html.textile.liquid is being included on the documentation. It has some other token-related information that may need relocation.
- File sdk/python/tests/run_test_server.py has now old SSO config sections that make
- File services/api/test/test_helper.rb -- Line 28: mentions omniauth's initializer
- File build/rails-package-scripts/arvados-api-server.sh -- Line 17 also mentions omniauth initializer

- File services/api/app/views/static/intro.html.erb -- Line 21 mentions /auth/joshid. Also, that file mentions Curoverse in several places.
- File lib/controller/rpc/conn_test.go -- Line 55 has an assertion about the /auth/joshid callback.

Reviewing [b6d8769](#)

- Not wanting to scope creep but I've found more curoverse references at file services/api/app/controllers/arvados/v1/schema_controller.rb, not sure what's the function of those scopes URLs.
- Other than that, it LGTM

#12 - 06/28/2021 04:26 PM - Peter Amstutz

I think the idea is that we would limit API calls based on OAuth2 scopes associated with the token. But we never did that (our token scopes behave completely differently). I'm pretty sure it isn't used by anything but also mostly unrelated to this ticket so I am not going to mess with it.

- Other than that, it LGTM

Thanks, merged.

#13 - 06/28/2021 04:42 PM - Peter Amstutz

- Status changed from *In Progress* to *Resolved*
