Description			
When directly accessing a project with P_UUID via URL one can use : https://wb2.[domain]/projects/P_UUID For Collections with C_UUID: https://wb2.[domain]/collections/C_UUID			
If one uses it the wrong way e.g. a https://wb2.[domain]/projects/C_UUID the page loads for some time and shows a blank page. Either show an error that no project with this UUID is existing or show the collection as the normal search does.
