<b>Target version:</b>	Testing and Upgrading + PGP.ca features		
<b>Description</b>			
<b>Subtasks:</b>			
Task # 2534: Turn non-view, site-specific string literals into translations			<b>Resolved</b>
Task # 2536: Review 2502-site-labels			<b>Resolved</b>

#### Associated revisions

##### Revision 9334a92c - 04/05/2014 07:34 PM - Phil Hodgson

Another signup correction (refs #2502)

##### Revision d67937cf - 04/06/2014 09:44 AM - Phil Hodgson

Turn occurrences *outside of the views* of phrases specific to "the PGP" or "personalgenomes.org" into translations (fixes #2534, refs #2502)

#### History

##### #1 - 04/02/2014 03:01 PM - Phil Hodgson

- Subject changed from *Make all the site-specific one-liners configurable* to *Make all the site-specific labels configurable*

##### #2 - 04/04/2014 04:15 PM - Ward Vandewege

- Parent task deleted (#2501)

##### #3 - 04/04/2014 04:16 PM - Ward Vandewege

- Tracker changed from Task to Story

##### #4 - 04/06/2014 09:50 AM - Phil Hodgson

On review it seems to me that there is every reason to use the [#2518](#) functionality to override views on a site-specific basis. The fact is that it is much more than simply the name "The PGP" and so on that need to be reviewed and re-written by each site, so it seems pointless to parameterize these phrases within the views. I therefore limited my changes to the minimal ones that would remove from anything outside of the views those occurrences of certain strings identified by Joe. A much more thorough job could be done, but it will take a lot of time, and many of the non-view hard-codings of strings should actually be refactored in a more consistent way to begin with. Furthermore, we will probably change the way many enrollment forms work in a fundamental way, to make the system more dynamic and configurable, and that will be the best time to refactor all the many, many other hard-coded strings.

Reviewing 2502-site-labels

7e7c32f7883e674e6c2a648f94c74987144405d3:

This change is not correct; the signup path linked here should be changed to a configuration parameter that, for Harvard, will be set to

<http://www.personalgenomes.org/harvard/signup>

So please add a `signup_link` parameter to `config/config.defaults.yml` and set the default to `'/signup'`. I will override it in our Harvard deploy config to the link above. And please add a comment there that `signup_link` should probably be changed to the signup page for the project on the `personalgenomes.org` site.

Other than that, I agree with your assessment to make the changes outside views this way, and let the references to 'the PGP' etc be inside the views, since they can now be overridden via the `site_specific` directory.

Good to merge once the above change is made!

Thanks,  
Ward.

**#6 - 05/21/2014 09:43 AM - Phil Hodgson**

- *Status changed from New to Resolved*

The new config setting has been added ('signup\_url') and the 2502 branch merged to master.
