Arvados - Bug #3834

[Workbench] pipeline instance that is RunningOnClient should be rendered as Running, not Ready.

09/08/2014 11:20 AM - Abram Connelly

Status:	New		**Start date:**	09/08/2014
Priority:	Normal		**Due date:**	
Assigned To:			**% Done:**	0%
Category:	Workbench		**Estimated time:**	0.00 hour
Target version:	Arvados Future Sprints			

Description

Running pipeline instance qr1hi-d1hrv-lh4tb4ozwupp60i on lightning-dev2, I see the status of the currently running job (qr1hi-8i9sb-93eac0la1w7h7td) in workbench, but the pipeline instance page does not show me that it's running and shows me a message:

```
This pipeline does not need any further inputs specified. You can start it by clicking the "Run" b
utton whenever you're ready. (It's not too late to change existing settings, though.)
```

The pipeline was created and run with the following (abridged) commands, running on lightning-dev2:

```
arv pipeline_instance create --pipeline-instance ...
```

```
arv pipeline run --run-here --instance ...
```

This might not be a bug and might be intented behavior since I'm running the pipeline from lightning-dev2 but it's a bit confusing.
