

Arvados - Bug #3973

[Workbench] After cloning a pipeline instance, the new instance should not have any cancelled jobs/components

09/24/2014 03:13 PM - Tim Pierce

Status:	New	Start date:	09/24/2014
Priority:	Normal	Due date:	
Assigned To:		% Done:	0%
Category:	Workbench	Estimated time:	0.00 hour
Target version:	Arvados Future Sprints		
Description			
On pipeline qr1hi-d1hrv-pr1aen5iz9x7zrv , the allelotype_run component of the pipeline was cancelled. When the pipeline instance is re-run, this component remains cancelled in new runs.			

History

#1 - 09/24/2014 03:14 PM - Tim Pierce

- Description updated

#2 - 09/25/2014 08:47 PM - Tim Pierce

- Subject changed from cloned pipeline instance also clones 'cancelled_by' to cancelled jobs remain cancelled when pipeline instance is re-run

- Description updated

- Target version changed from Bug Triage to Arvados Future Sprints

#3 - 09/26/2014 04:45 PM - Tom Clegg

- Subject changed from cancelled jobs remain cancelled when pipeline instance is re-run to [Workbench] After cloning a pipeline instance, the new instance should not have any cancelled jobs/components

- Story points set to 0.5
