it would make editing templates faster			

History

#1 - 10/29/2014 06:56 PM - Ward Vandewege

- Subject changed from *When editing a template and faced with a parse error, when trying again, it should automatically take you to the line/column of the error* to *[SDK] When editing a template in arv-edit and faced with a parse error, when trying again, it should automatically take you to the line/column of the error*

#2 - 10/30/2014 12:52 PM - Brett Smith

- Subject changed from *[SDK] When editing a template in arv-edit and faced with a parse error, when trying again, it should automatically take you to the line/column of the error* to *[SDKs] When editing a template in arv-edit and faced with a parse error, when trying again, it should automatically take you to the line/column of the error*

- Category set to *SDKs*

- Target version set to *Arvados Future Sprints*

This sounds pretty cool but I'm not sure it's going to be possible. Because arv edit uses your preferred editor, some editors may not support this, and the rest will have different syntaxes for doing so.
