

Arvados - Feature #4393

[Workbench] Display portable data hash, parent project, file count in Collection tables

11/03/2014 01:34 AM - Anonymous

Status:	New	Start date:	11/03/2014
Priority:	Normal	Due date:	
Assigned To:		% Done:	0%
Category:	Workbench	Estimated time:	0.00 hour
Target version:	Arvados Future Sprints		
Description			
Let's say I've created a Collection "Gemini data" and copied it into a variety of different projects. Then I created another collection called Gemini data with different data. Now if I search for "Gemini data" I get back a lot of collections with the same name, but I can't tell they are different or the same. Seeing the content addresses in the search results would be a quick way to compare them. Also, seeing the project that they are in might be helpful, as well as the number of files and Mib.			

History

#1 - 11/03/2014 03:21 PM - Brett Smith

- Subject changed from *In the search results, it would be nice of the content ID was shown and project to [Workbench] Display portable data hash in Collection tables*
- Category set to Workbench
- Target version set to Bug Triage

#2 - 11/03/2014 03:22 PM - Brett Smith

- Subject changed from *[Workbench] Display portable data hash in Collection tables to [Workbench] Display portable data hash, parent project, file count in Collection tables*

#3 - 11/03/2014 06:53 PM - Brett Smith

- Target version changed from *Bug Triage to 2014-11-19 sprint*

#4 - 11/03/2014 06:53 PM - Brett Smith

- Target version changed from *2014-11-19 sprint to Arvados Future Sprints*
