

## Arvados - Feature #4808

### [Workbench] "Add data from another project" modal supports regex filtering

12/12/2014 04:56 PM - Bryan Cosca

<b>Status:</b>	New	<b>Start date:</b>	12/12/2014
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assigned To:</b>		<b>% Done:</b>	0%
<b>Category:</b>	Workbench	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	Arvados Future Sprints		
<b>Description</b>			
When clicking Add data button in a project, users should be able to choose what data they want from a collection to create a new collection in their project. Say if there's 10 files in a collection and you only want to add 5 of those, you should be able to regex in that pop-up box and only grab the files you need, instead of copying the entire collection, going into that collection and regexing the files you want to create a new collection.

#### History

##### #1 - 12/15/2014 03:44 PM - Brett Smith

- Subject changed from Add data feature for adding new collections to [Workbench] "Add data from another project" modal supports regex filtering
- Category set to Workbench

Bryan,

If Workbench had other rich collection editing features, would that satisfy you as well? For example, what if, after you copy a collection, there were a quick and easy "delete files from collection" button that edited the collection in place like file upload does?

##### #2 - 12/15/2014 03:53 PM - Bryan Cosca

Brett, yeah that would be great, deleting files and renaming files in a collection within workbench would be awesome. I think [#3821](#) is what I'm looking for.
