<b>Description</b>			
Based on user feedback, users of workbench would like to:			
<ol style="list-style-type: none"><li>1. Get a timeline of changes to records (such as a past versions of pipeline template or collection)</li><li>2. View the contents of past versions</li><li>3. Resurrect past versions (either a "revert" button or a "copy to a new record" button)</li></ol>			
All of the necessary history should be available in the logs table, so this is primarily a workbench / user interface task.
