- Category set to Workbench

- Status changed from New to In Progress

#3 - 03/12/2015 03:56 PM - Tom Clegg

LGTM @ 5aff810

Just a formatting nitpick: "text:Rails.configuration.site_name.downcase" should be "text: Rails.configuration.site_name.downcase"

#4 - 03/12/2015 04:10 PM - Radhika Chippada

- Status changed from In Progress to Resolved

- % Done changed from 0 to 100

Applied in changeset arvados|commit:2f9de559616c21a8f5672017abd13d7319a05196.

#5 - 04/01/2015 05:38 PM - Nancy Ouyang

I'm curious about the thought process behind this, right now if a first time user is coming in through an anonymous project, such as pathomap, then they hit "login" they are immediately hit with a google sign in page which may be very confusing. Perhaps, for logged-out users, 'log-in' should say "log-in/sign-up"?

But in any case, it may be better for them to fumble around and go to the Safe page and read "oh, you login with a google account" and that will make more sense, as opposed to being stuck in this isolated webpage and the login page looks like a phishing page asking them to enter their google credentials.
