

Arvados - Feature #5439

[Tests] Provide a docker image, based on puppet/packer process, that can run the entire test suite quickly.

03/11/2015 06:16 PM - Tom Clegg

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assigned To:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	Arvados Future Sprints		
Description			
This should reduce the prerequisites for a new developer / dev box to just "docker installed & working".			

History

#1 - 03/11/2015 06:25 PM - Tom Clegg

- Description updated

"Quickly" means all dependencies are installed: for example,

- Go, ruby, python, virtualenv, passenger
- the only thing "bundle install" has to do during run-tests.sh is install the current arvados and arvados-cli gems -- or, if the version is pinned in Gemfile.lock, copy the packaged version sitting in vendor/bundle (or wherever bundle puts that).
