

Arvados - Feature #5495

[Workbench] Change "recent pipelines" to curated selection of "public pipelines"

03/17/2015 08:52 PM - Nancy Ouyang

Status:	New	Start date:	03/17/2015
Priority:	Normal	Due date:	
Assigned To:		% Done:	0%
Category:	Workbench	Estimated time:	0.00 hour
Target version:	Arvados Future Sprints		
Description			
See attached screenshot. This a quickfix. We should include a "public pipelines" and "public collections" panels underneath the "recent pipelines" and "recent collections". Ideally, on first login, "recent pipelines" and "recent collections" is empty (otherwise, they may wonder about security / if everyone can see their pipelines or data) and they see public pipelines / collections on the page. Then as they start running pipelines, the public pipelines / collections can get pushed under the page fold. Mockup attached, however is incorrect (shows deletion of 'recent pipelines' and 'recent collections', however these two views are not easy to discover if they are not on the dashboard). We should also publish some guidelines for inclusion in curated selection: 1. documented 2. has readme 2. describes how to check that output of pipeline is correct

Quickfix -- see mockup <https://arvados.org/issues/5493#note-2> , essentially don't change workbench dashboard for now, instead add link in "?" top dropdown menu to wiki page, https://arvados.org/projects/arvados/wiki/Public_Pipelines_and_Datasets

#3 - 04/03/2015 09:14 PM - Brett Smith

- Category set to Workbench

- Target version set to Arvados Future Sprints

The quickfix above has been implemented. I'll leave this open for the larger dashboard change.
